Talentia Core HR

Talentia Core HR is the most comprehensive HR data management system available today. Combining organisational agility with unified data management, it offers a global and collaborative HR ecosystem.

Single Source

Unifying and using HR data (both globally and locally) couldn't be simpler. Consolidate information from payroll and other systems for a comprehensive, real-time view of the workforce. Leverage a flexible central framework to set up, optimise and adapt organisational data.

Agile processes

You can deploy built-in standard processes or let your people create their own: Foster a fluid and collaborative approach to creating and managing all HR processes linked to Payroll, Time & Attendance Tracking, or any third-party system.

Drive engagement

Create a new service-based experience for managers and employees. Empower users to customise their workspaces through e-HR store apps and widgets, for enhanced collaboration and autonomy in skills development.

Secure data

Leverage a secured environment ensuring total data control, traceability and reliability, as well as built-in personal data protection features towards GDPR compliance.

A complete vision of your
human capital

Measurable benefits

A common HR culture reconciling **global and local needs**

A new experience to drive **high impact engagement**

A secured flexible framework for **maximum organisational agility**
